Involvement

Team Member, Appdroid (Lassonde School of Engineering)

- Report documented and summarized team meetings to senior executives;
- Develop promotional advertisements for upcoming events and workshop, e.g. video and posters;
- Market to and inform 100+ potential attendees of upcoming events and workshops;
- Manage and assist with organizing and running web & mobile application development events and workshops with 20+ attendees.

Projects

Expense Tracker

A full stack application that keeps track of your daily expenses. The front-end is done with **React.js**, while the back-end is written with **Spring Boot**.

Fridgeful

3rd place, Ellehacks 2020

Android mobile and Google Assistant application created with **Android Studio**, **Java**, and **Voiceflow**. The app tracks fridge inventory, organizes items based on expiration date, and suggests recipes based on nearest expiration dates, to induce users to reduce food waste.
